Online Conference

“The European Silver Economy in 2021: the case of Eldicare”

- 29 March 2021-
10:30 -13:00 (CET)

During this European online Event, the Eldicare project (see below ‘*About Eldicare*’) will be presented and different aspects connected to the sector of Elderly Care will be discussed.

This event will be the opportunity to address the following issues:

- Consequences & Impact of Covid-19 in the Elderly Care sector
- The use of ICT in Elderly Care and its ongoing increase
- The formal and the informal Caregiving Sector
- The ongoing and the upcoming policies on Elderly Care
- How the Eldicare project corresponds to the aforementioned issues

Speakers:

- **Dubravka ŠUICA** - European Commissioner for Democracy and Demography (*Video Message*)
- **Eva MAYDELL** - Member of the European Parliament, President of the European Movement International (*Video Message*)
- **Eva VAIOLLI** - Project Manager, AKMI SA
- **Aad KOSTER** - 1st statutory vice-president of European Ageing Network (E.A.N.)
- **Věra HUSÁKOVÁ** - Regional Director, SeneCura (Czech Republic)
- **Claire CHAMPEIX** - Policy officer (Eurocarers)
- **Borja ARRUE-ASTRAIN** - Policy and Project officer, AGE Platform
- **Dr Peter KEVERN** - Professor of Values in Health and Social Care, Staffordshire University
- **Moderator and speaker: Theodor GRASSOS** - Secretary General of EVBB

About Eldicare:

The Erasmus+ project: “**Eldicare: Matching skills in a growing European Silver Economy**” is an answer to the latest CEDEFOP Skills Panorama findings (12/2016) on the skills mismatch in the Elderly Care Sector. Adaptation to an ageing society requires enhanced efforts from all to maintain older peoples' social inclusion. It also requires creating age-friendly environments, including mainstreaming of services and commodities accessible to all. ICT is also essential as it enables integrated person-centered care, with more focus on prevention, early detection, and independent living.

Our project aims to offer a pathway out of the grey market for atypical/undeclared elderly caregivers through education and training in ICT & health applications. It will modernize/innovate the way elderly care is provided by designing two fresh market-driven curricula responding to the needs of this special demographics group and their families and close ones.
